Evidence Module 3 Lab 1

- Step 2:

Entity	Type	Confidence
Sam Reyes	Name	0.99+
Sam.reyes@example.com	Email	0.99+
310-555-5787	Phone	0.99+

Switching to Labels view changes to just showing Types and Confidence

Types: Email, Name, Phone

Confidence: 1.00, 1.00, 1.00

I have no beginning and ending numbers.

Step 3:

Entity	Type	Confidence
dana.kim@example.com	Email	0.99+
Dana Kim	Name	0.99+
310-555-9558	Phone	0.99+
Lena Reyes	Name	0.99+
2523	Credit debit number	0.96
lena.reyes@example.com	Email	0.99+
Lena Nguyen	Name	0.99+
1906 Ocean Ave	Address	0.99+
310-555-9010	Phone	0.99+

My cutoff: 0.99+

Detections it drops: below .99

Why this number: I would want to be sure that no personal information is leaking or getting out. With this drop of below .99 the credit debit number would be redacted immediately. It is safer to redact information when not sure if it is super important personal information than to have it leak or be used improperly. If it redacts information that should not be redacted it would be a little annoyance and can be fixed compared to someone using leaked information for malicious intent.
